

Verified Credits LLC Announces Exclusive Carbon Credits Registry Partnership with Zoetic

SAN JUAN, PUERTO RICO – (April 23, 2023) – Verified Credits LLC announced today that it has been named as the exclusive carbon credits registry for Zoetic Global, a solutions provider focused on delivering critical energy, water, food, and healthcare technologies to areas of greatest need.

Working in conjunction with its technology and strategic partners, Zoetic offers businesses advanced solutions to their greatest challenges, including access to hydrokinetic, wind and solar power, energy efficiency technologies, and systems for supplementing electrical supply and infrastructure in remote areas. Zoetic’s global portfolio of energy efficiency projects includes innovative refrigerants projects at public and private facilities in the United States, Asia, Middle East and Africa. As an example, Africa’s population is 1 billion+ with hundreds of millions of people in countries south of the Sahara having no reliable access to electricity.

“Uninterrupted access to electricity is a prerequisite to economic growth, resilient communities, and improved quality of life. The planet is starting to understand the consequences of using fossil fuel sources. We know we have to change our perspective on energy production and consumption in short order if we are to keep a habitable planet for future generations to come,” said Steve Scholl, Principal at Verified Credits LLC.

In addition to its partnership with Zoetic, Verified Credits works closely with Atmosphere Group, which identifies nature-based projects that have a positive potential environmental impact and that make significant contributions to their communities. Atmosphere’s unique technology platform is a one-stop solution that begins with utilization of Atmosphere’s carbon calculator to estimate the annual carbon footprint of each individual or business prior to purchasing Super Carbon Credits. All projects are also verified by a reputable, third party to certify compliance with the United Nations Framework on Climate Change standards.

About Verified Credits

Verified Credits is a leading carbon credit registry and exchange. It was founded to ensure that everyone can take personal responsibility for his or her own carbon footprint. The goal is to democratize access to making an impact. Verified Credits has created a carbon credit infrastructure that brings transparency, accessibility, liquidity, and standardization to the market. Every carbon credit is backed by a metric ton of

certified emissions reduction. It's a virtuous circle that begins with landowners who agree to conserve or replant their deciduous forests, rainforests, and arable land. This removes the incentives for deforestation that have decimated the major carbon sinks around the world. It also includes technologies that permanently avoid or eliminate carbon dioxide, other greenhouse gases, and particulate matter pollution. This has the additional benefit of eliminating other sources of climate change as well as helping to reduce the deleterious effects on human and animal health. Only those projects that meet all of stringent requirements are minted and registered with Verified Credits and receive the green check.

About Zoetic Global

Zoetic is a solutions provider focused on delivering critical energy, water, food, and healthcare technologies to areas of greatest need. Working in conjunction with its technology and strategic partners it has assembled a compelling portfolio of now solutions for now problems. Zoetic means, "of or pertaining to life." It embodies the dedication of its Co-Founder and Chairman, Jerome Ringo, who has been a leader in the climate movement for two decades. Zoetic is focused on the inclusion of areas of the world disproportionately impacted by climate change. Zoetic believes that critical solutions exist, what is needed is a next level commitment by leaders to implement them.

About Atmosphere Group

Atmosphere is committed to helping businesses and individuals adopt sustainable business solutions. In order to be successful and safeguard our planet's future, sustainability must come first. Atmosphere's mission is twofold, to create a program geared toward rewarding sustainable decisions and actions taken by individuals, businesses, and partners alike while simultaneously pushing for positive progress towards preserving the world for generations to come.
